

REDBIRD ROBOTICS - FRC 1807

Dear Corporate Sponsor,

Are you ready to ignite the future of STEM?

We are *FIRST* Robotics Team 1807 from Allentown High School. *FIRST* is an international non-profit organization that challenges students to build and program industrial-sized robots for intense field competitions.

Our team provides a hands-on environment where 45 students master science, technology, engineering, math, and business. Through hard work and teamwork, we solve complex problems and build a stronger community.

To succeed, we need your help. Building a robot, paying competition fees, purchasing equipment, and traveling to events creates a financial burden. Your support ensures we can continue competing and expand STEM opportunities for students.

As a sponsor, there are many benefits to reinforce and celebrate your commitment, which are included on the attached “Corporate Sponsorship Levels” page.

If you are interested in sponsoring our team, **please see the attached information.**

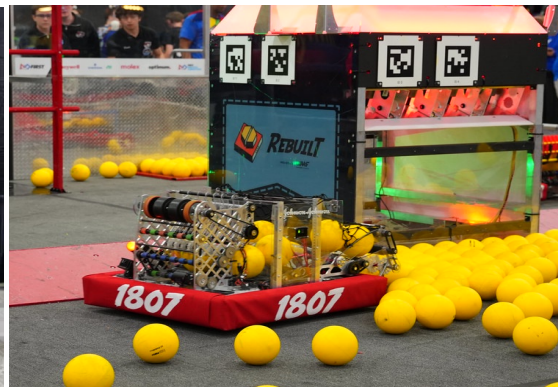

We thank you in advance for your consideration in supporting the Redbirds this 2026-2027 school year. Through all the struggles, victories, and learning experiences that present themselves, we work hard to represent and honor the supporters that make this happen. We look forward to hearing from you soon!

Sincerely,

Redbird Robotics FRC 1807
